PROFESSIONAL SUMMARY

Customer enablement and adoption specialist — 4+ years turning products into sustained usage at LVMH and Dolce & Gabbana; designed and delivered training workshops and drove daily adoption of an AI-assisted app I built (~20 users). Skilled at translating AI capabilities into practical value for business, technical, and executive audiences.

EDUCATION

Cornell University — *Master of Engineering, Data Science & Decision Analytics (DSDA)* New York, NY | Expected May 2027
City, University of London — *MSc Global Finance — Merit* London, UK | Sep 2023 – Aug 2025
University of Sharjah — *BSc Industrial Engineering & Engineering Management* Sharjah, UAE | Sep 2018 – May 2021
• CGPA 3.95/4.0, Dean's Honors List (all years); Chancellor's List Medal 2018 (Year 1 at American University of Sharjah).

EXPERIENCE

Dolce & Gabbana Beauty — *Customer Success & Key Account Manager, Travel Retail Middle East* Dubai, UAE | Mar 2024 – Present

- Designed and delivered sales-enablement workshops for a 30+ person beauty-advisor team — built the curriculum, ran live sessions, and tracked performance — standardizing execution and lifting sell-out across markets.
- Grew net revenue 48% and sell-through 44% YoY (2025 vs 2024) across a 13-market account portfolio (GCC, Levant, Egypt) by prioritizing accounts on usage data and reallocating supply to demand — an expansion / net-revenue-retention motion.
- Built the health-monitoring layer for the portfolio: a multi-market sell-out tool that benchmarks account performance and flags at-risk accounts — now the primary decision input across all 13 markets.
- Ran quarterly business reviews and renewal negotiations with duty-free partners, translating account insights into placement wins and retained revenue.

LVMH Fragrance Brands — *Account Management & Commercial Operations (Travel Retail, MEA) — Givenchy & Kenzo* Dubai, UAE | May 2022 – Mar 2024

- Cut account order-cycle time from 45 to 5 minutes (~89%) across 30+ MENA locations by acting as internal product owner for a sell-in decision-support tool, iterated over two years on direct user feedback — a self-service adoption win for the account teams.
- Improved forecast reliability and order accuracy by defining requirements, prioritizing the roadmap, and running feedback loops with the account managers who used the tool daily — the single point of contact across retailers, marketing, demand planning, and supply chain.

LVMH Fragrance Brands — *Supply Chain & Operations Coordinator — Benefit, MUFE, Givenchy & Kenzo* Dubai, UAE | Oct 2021 – May 2022

- Reduced out-of-stocks and aged inventory across MENA accounts by monitoring stock and logistics flows and aligning replenishment to promotional calendars.

PROJECTS

Homebase — *AI-Powered Property Management OS for Dubai* github.com/bm2515/homebase

Next.js, React, Tailwind, Firebase/Firestore

- Co-built an MVP that automates RERA-compliant lease renewals and maintenance coordination; defined product scope end to end — data model, dashboard, CRUD flows, bilingual (EN/AR) renewal notices.
- Evaluated the AI agent through structured usability testing with real users and log-based review of the agent's outputs, surfacing failure modes and iterating to improve reliability.

Sales Management Tool (*in progress*) github.com/khalidduaa1-byte/Sales_management

Python, Supabase, data modeling, dashboarding

- Built a production account-management app and drove its adoption — onboarding and training ~20 field users into sustained daily usage; codifies allocation logic, sell-out tracking, and prioritization, and is designed for handover and multi-market expansion.

SKILLS

Enablement & Adoption: Instructional design, workshop facilitation, onboarding & learning-journey design, executive-ready communication, adoption frameworks, activation & sustained usage, time-to-value, playbooks

Customer Success: Retention & churn reduction, account expansion / upsell, QBRs, renewal negotiation, stakeholder management, customer health monitoring, voice of the customer

Product & Technical: Product strategy, roadmap prioritization, KPI definition, MVP scoping; SQL, Python, Advanced Excel, Git; Next.js, React, Firebase/Firestore, Supabase; data modeling, LLM-assisted development, AI evaluation (human + log-based)

Languages: English, Urdu, Hindi (fluent); French (basic)
